

PC PHASE CONSULTING

talent  **lms**

A super-easy, cloud LMS

to train your employees, partners and customers.

Bring your courses to life

Build beautiful courses with extensive learning attributes, fast!

Reuse content from everywhere

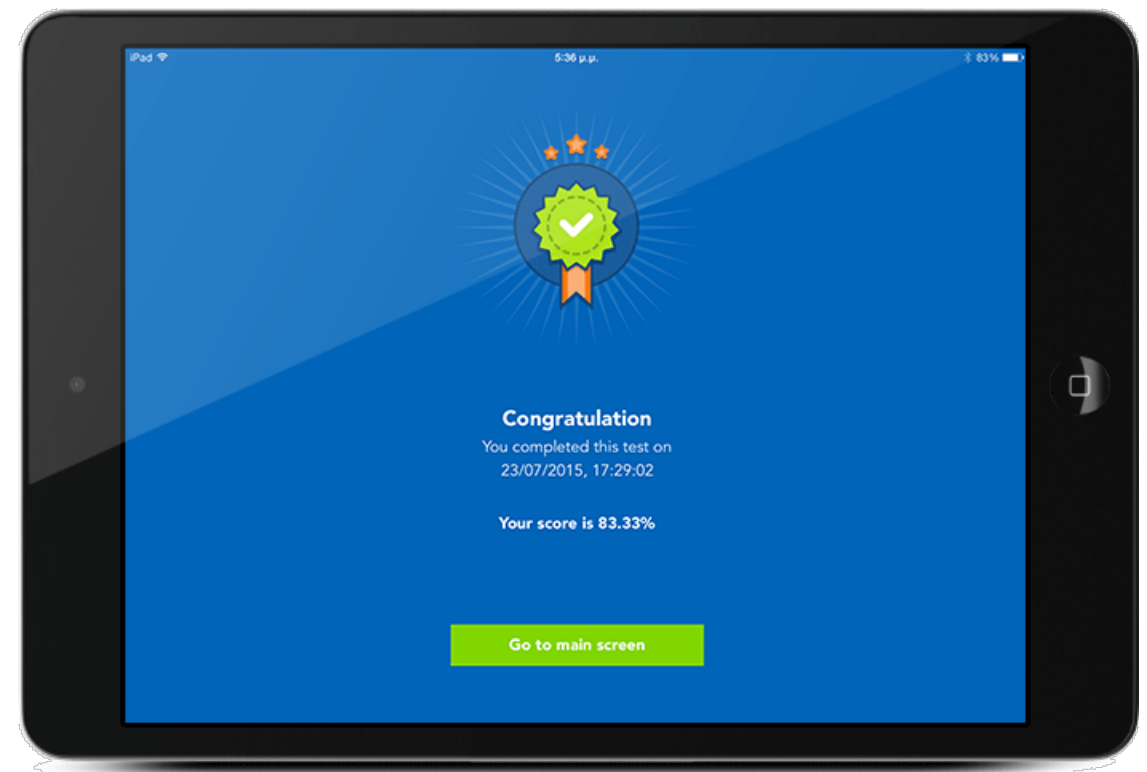

Create stunning courses with any and pretty much every multimedia element you want. With additional support for SCORM and TinCan, the industry standards in content interoperability, the experience you can offer is limited by your imagination only.

Assess your training

Tests make it easy to evaluate what people learned and ensure critical knowledge is properly disseminated in your organization. With support for multiple question types and a variety of test characteristics the assessment engine will keep you covered.

Blend your training

Combine eLearning and Instructor-led training in any way you see fit.

TalentLMS will help you organize real-world events either in the classroom or via videoconference.

The screenshot displays the TalentLMS calendar interface. At the top, there is a blue header bar. Below it, a search bar and a 'Users' button are visible. The main calendar view shows the month of November 2015. A modal window titled 'Meeting 1 - Meet and greet' is open, displaying the following details:

- When:** 04/11/2015 16:00 - 18:00
- Instructor:** L. Mastori
- Capacity:** 0 / Unlimited
- Description:** Our first meeting so that we can get to know each other before we start our classes.
- Location:** Auditorium B

At the bottom of the modal, there are three buttons: 'Edit', 'Users', and 'Clone'. The calendar background shows various events scheduled for the month, including 'Meeting 1 - Meet and greet' on Wednesday, November 4th, and several webinars and group sessions throughout the month.

**Build and organize everything,
easy**

TalentLMS comes with a super-easy course management interface. Quickly add and re-order your content, build learning paths, manage users and view course reports from one centralized screen.

Deliver courses in style

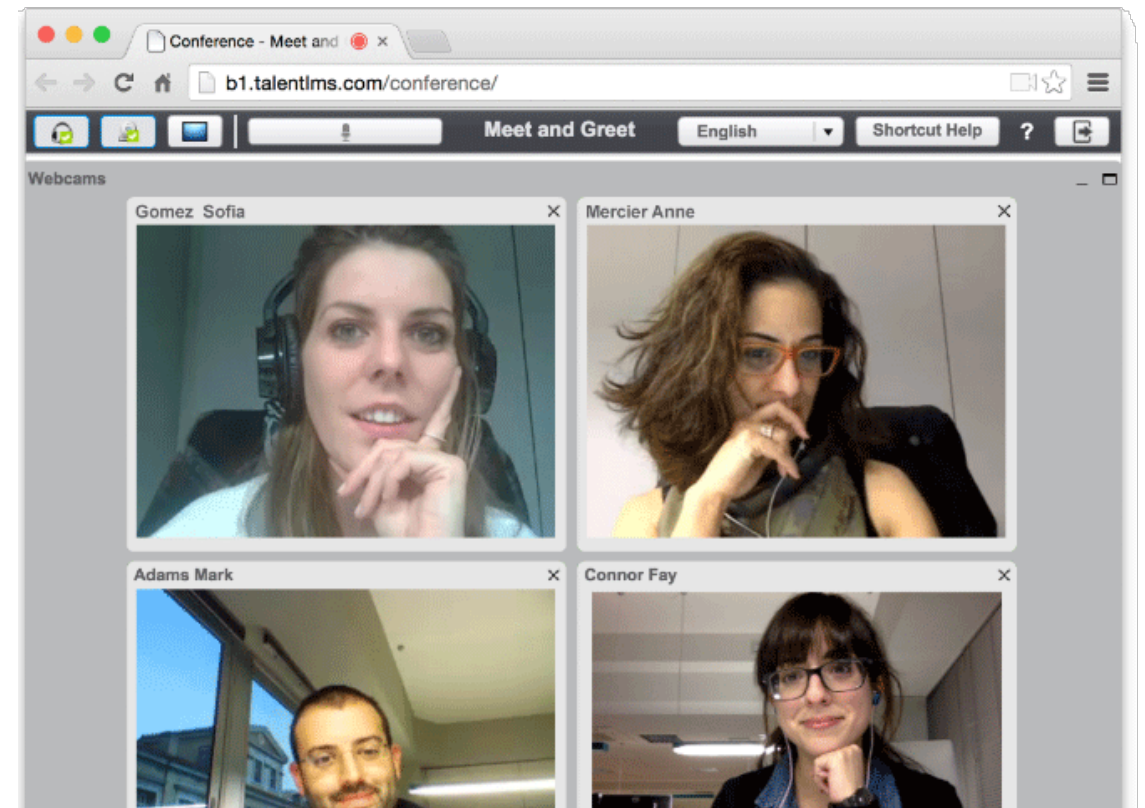

From mobile learning to compliance training, TalentLMS is versatile and powerful

Meet via videoconference

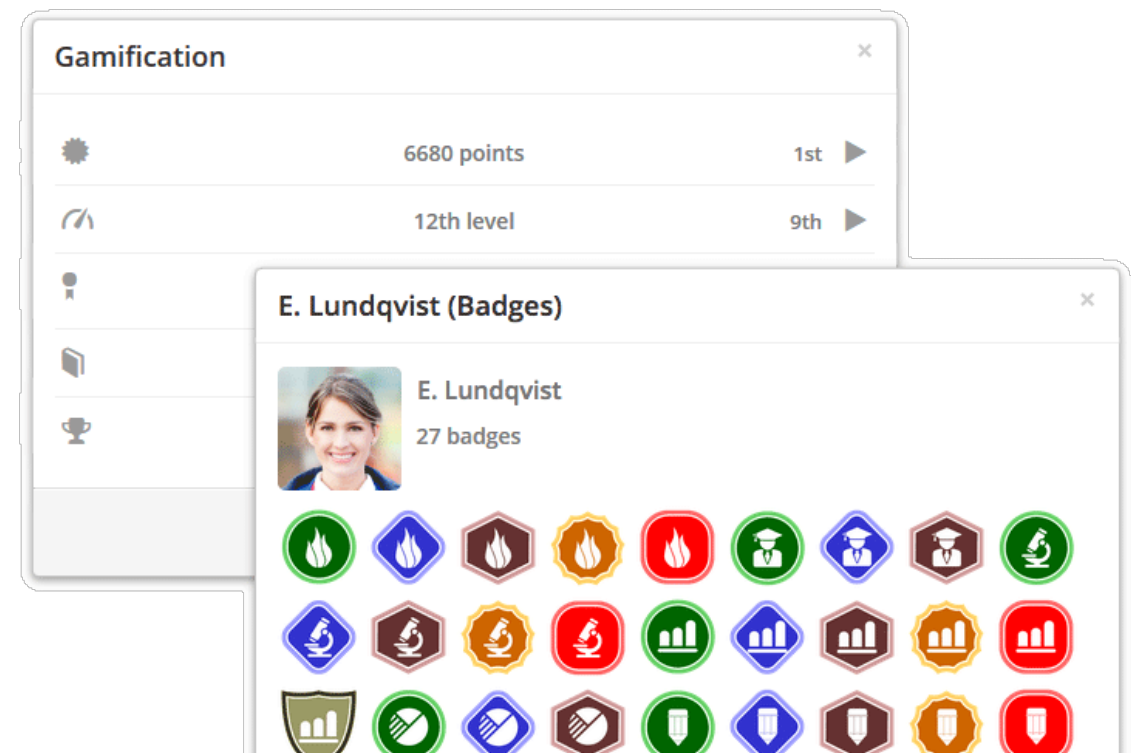

With a powerful embedded videoconference system, TalentLMS covers your meeting needs out-of-the box. If you require something more powerful, the integration with GoToMeeting and GoToConference is also an option.

Gamify the learning experience

Entice learners with built-in gamification elements and instill a spirit of friendly competition to boost retention and completion rates. TalentLMS comes with support for Badges, Points, Levels, Rewards and a Gamification Engine to customize the experience to your needs.

Build and issue branded certifications

Build and issue branded certifications.
Support various compliancy scenarios
that require re-certifications on
predefined intervals.

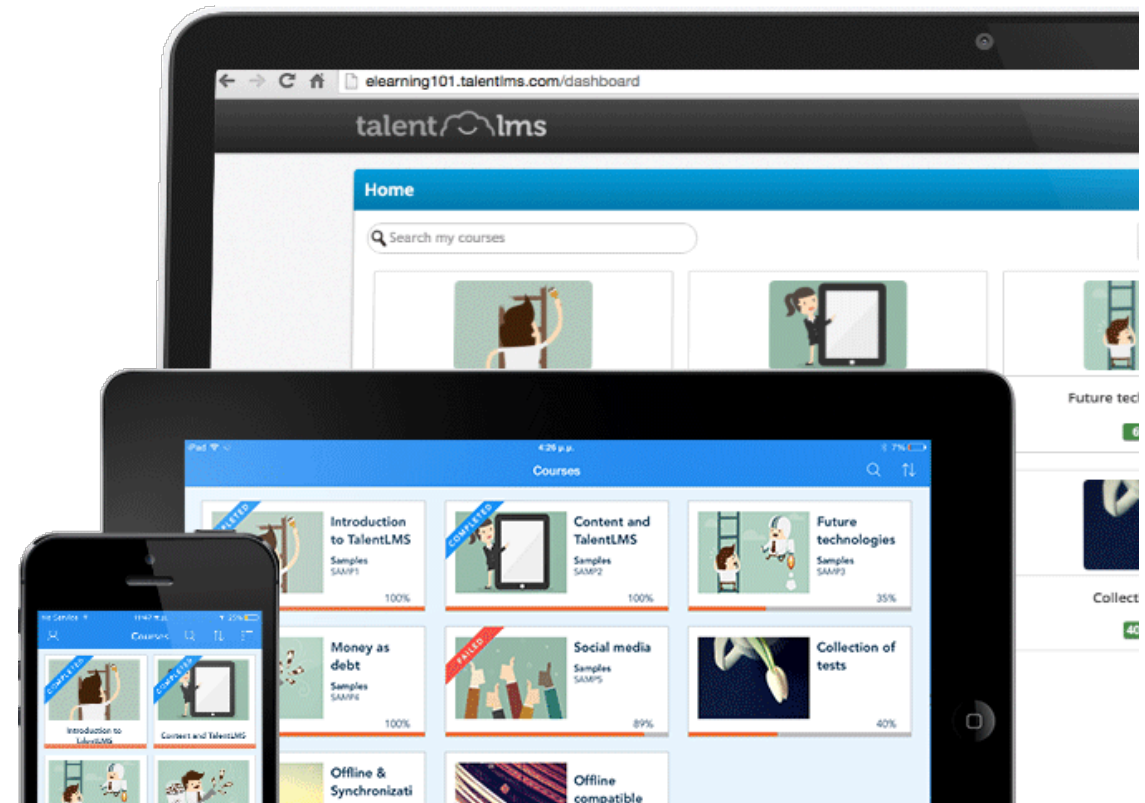

Deliver across any device

With a fluid interface, TalentLMS offers the same experience across all devices, from desktops to tablets and modern mobile device.

Native mobile applications available for iOS and Android.

Scalable based on your needs

From small teams to large enterprises, TalentLMS covers your unique needs

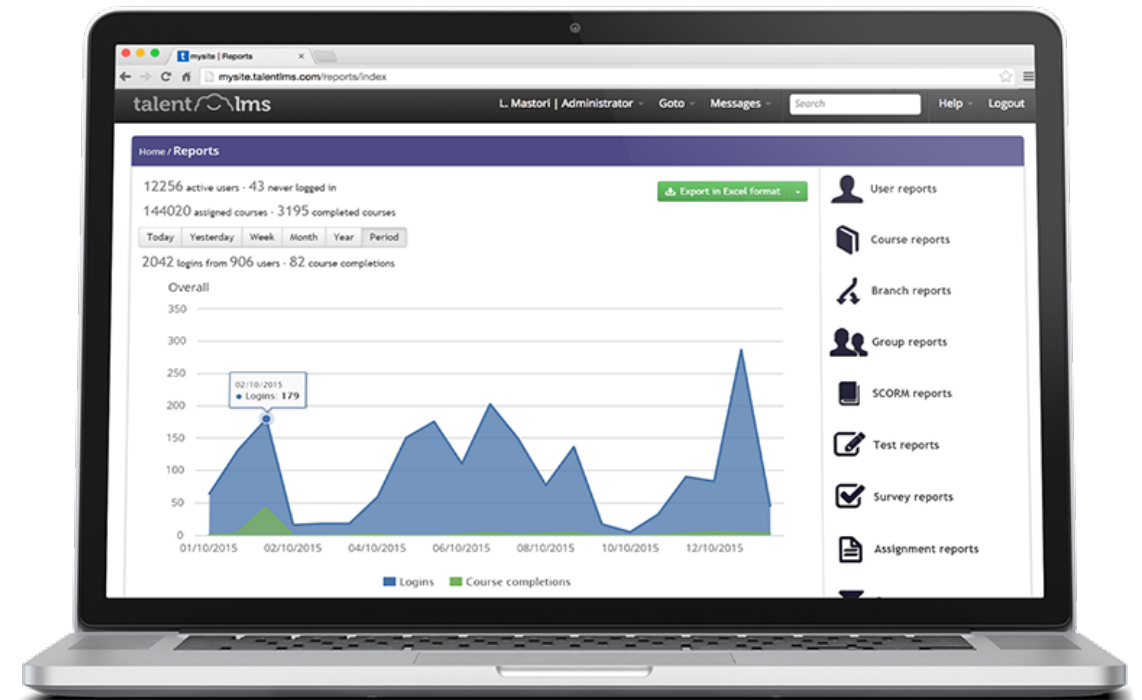

Report about everything

Monitor everything that matters with a variety of pre-made reporting dashboards.

Build your custom reports to drill down to details.

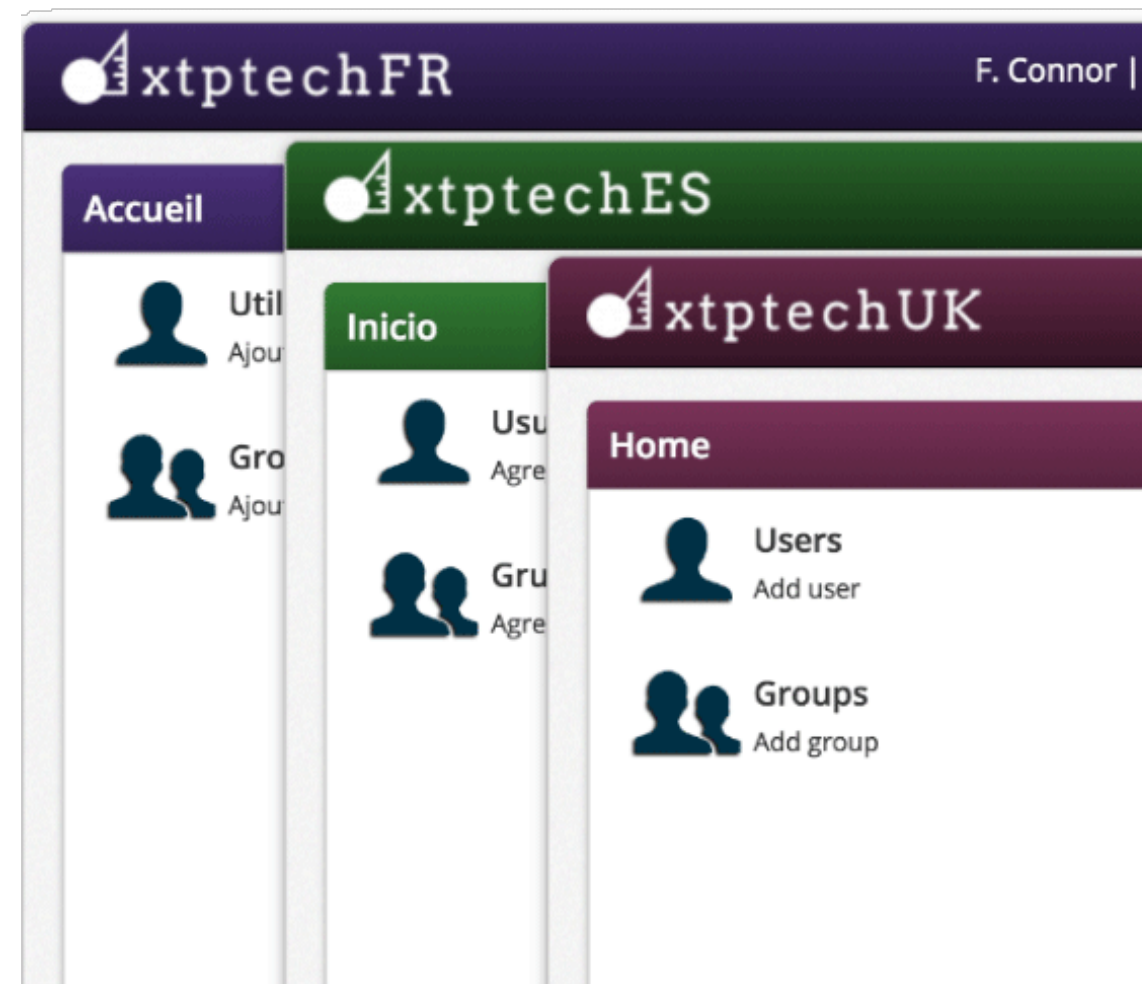

Schedule your reports and have them delivered to your email.

Segment your learning environment

Create entirely separate nodes for your teams, complete with their own courses, users and branding, URL, even language and time zone using the Branches feature. TalentLMS has a knack for going as small or as big as you need it to go.

Build custom roles and permissions

Use custom user-types to determine the level of access users have to your organization's data. TalentLMS lets you control access in such a fine-grained level that can even cover edge use-cases.

The screenshot shows the 'User types' configuration page in TalentLMS. The breadcrumb trail is 'Home / User types'. A sidebar on the left lists user types: SuperAdmin, Admin-Type, Trainer-Type, Learner-Type, and Adminingroup. The main content area is titled 'Home / User types / Marketing-Instructor'. It contains a form with the following fields: 'Name' (Marketing-Instructor), 'User type default role' (Instructor), and 'Permissions'. The permissions are listed as a tree: Administrator (unchecked), Instructor (checked), Courses (checked), Groups (checked), Reports (checked), and Conferences (unchecked).

Integrate with everything

TalentLMS works smoothly with more than 200 systems from Salesforce and Shopify to Mailchimp and Zendesk. We love exchanging data with other systems....literally!

Customize to the max

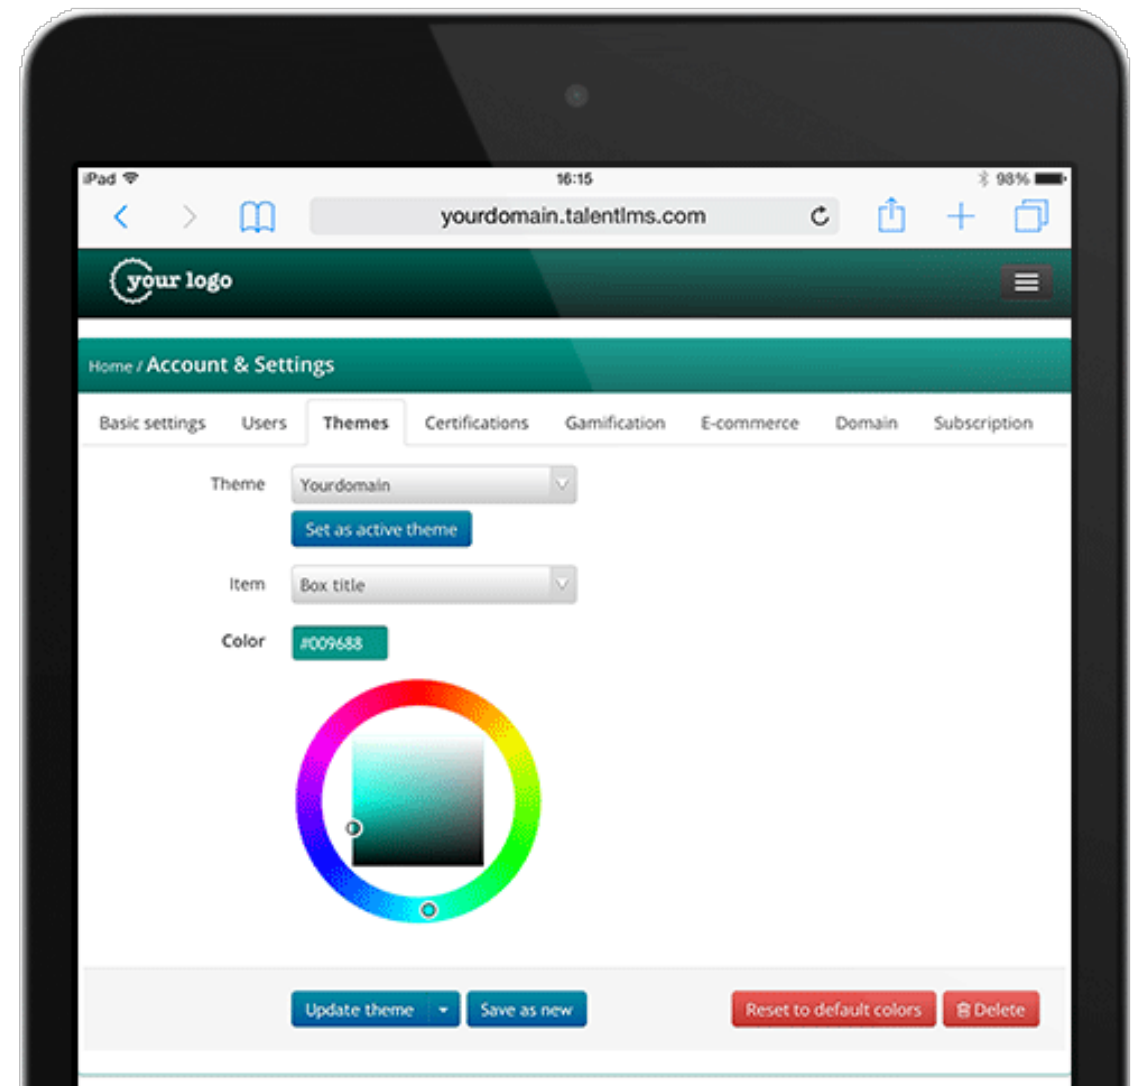

White-label your learning solution to great depth

Your theme

Enhance your company's brand by building a theme that conveys your own personality and style. TalentLMS lets you customize colors and fonts by using a friendly user interface. You can also dive into details by adding your custom CSS and JavaScript.

Your domain

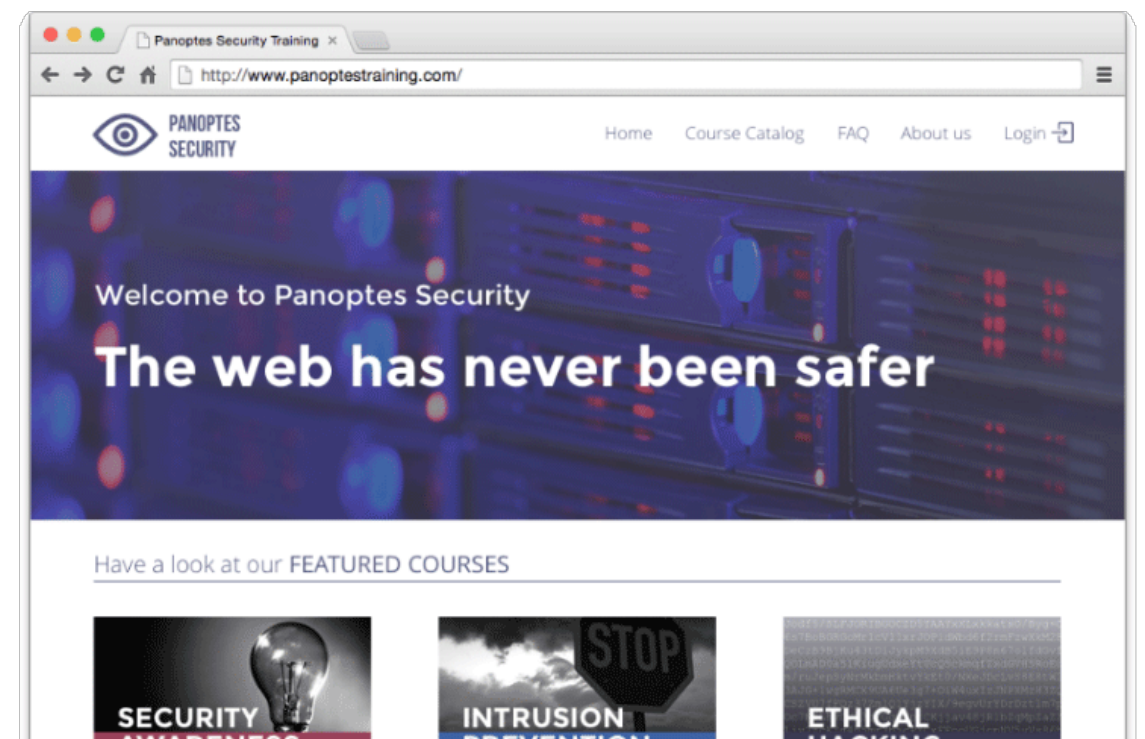

Each learning portal comes with its own unique TalentLMS subdomain; this is your home. You can further white-label it by mapping a URL of your own.

Your homepage

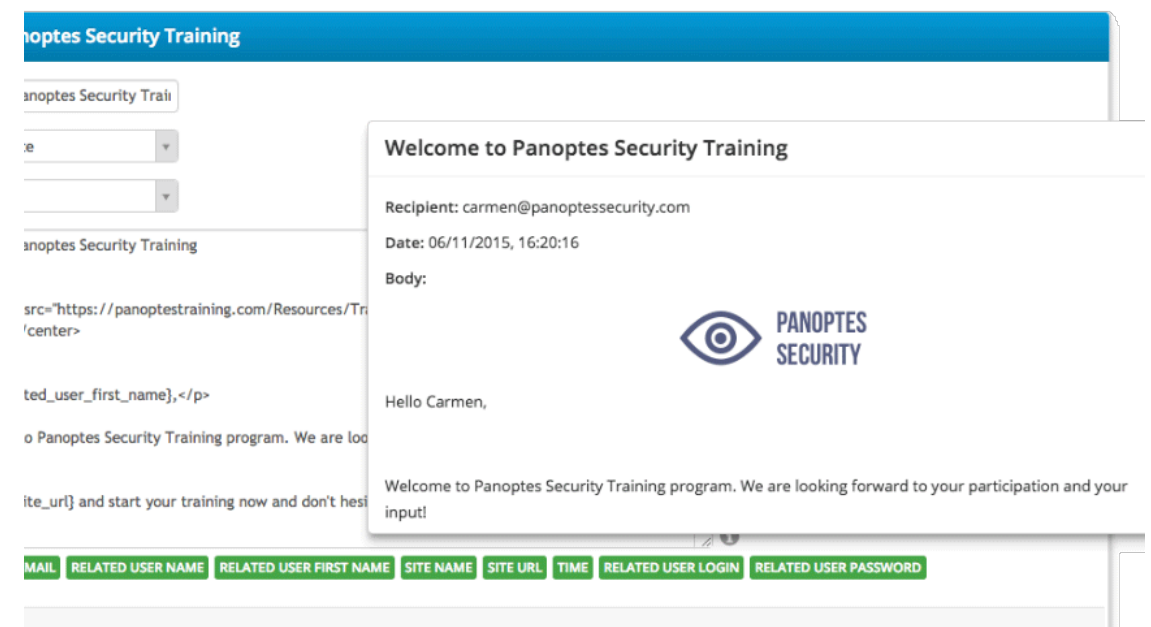

Create a beautiful, custom home page
with a simple integrated authoring tool
that is readily available within your
portal.

**Your branded communication
emails**

**Send custom email notifications with
the exact tone-of-voice you worked so
hard to build and for the events you
care about.**
